CONVEY THE FOLLOWING INFORMATION TO THE RESPONDENT: LUANAR University in Collaboration With Norwegian University of Life Sciences have since 2006 carried out a household survey that includes Your District and village. The data from the survey are used for capacity building of students and to learn about living conditions of Malawian farm households. The findings from the research are published and may be read by policy makers and thus indirectly have some impact on policies. The data collected are treated as confidential and no private information is made publicly available. This time Lead farmers and followers of lead farmers are also included in the survey to learn more about their experiences with Conservation agriculture Technologies which are of particular focus in this survey. The lessons about these Technologies will be disseminated to the relevant bodies in Malawi. The objective of this survey is to learn more about technologies that have performed better under difficult climate conditions such as drought and flood and based on that to develop better knowledge about appropriate Technology Choice. We hope you are willing to participate in the survey and inform us about Your experiences and living conditions and that you tell us truthful information to the best of your knowledge. Households that have been part of this survey also in earlier years will this year like in 2012 be asked also to participate in some Experiments that will also give some rewards that also serve to compensate for the time involvement in the survey.

Do you agree to participate in the survey? I Do not record an answer to this question until you have conveyed the introductory statement to the respondent.	SINGLE-SELECT consent 01 <input type="radio"/> YES 02 <input type="radio"/> NO

A GARDEN (MUNDA) IS A CONTINUOUS PIECE OF LAND AND SHOULD NOT BE SPLIT BY A RIVER OR A PATH WIDE ENOUGH TO FIT AN OX-CART OR VEHICLE. A GARDEN CAN CONTAIN ONE OR MORE PLOTS. A PLOT IS DEFINED AS A CONTINUOUS PIECE OF LAND ON WHICH A UNIQUE CROP OR A MIXTURE OF CROPS IS GROWN, UNDER A UNIFORM, CONSISTENT CROP MANAGEMENT SYSTEM. A PLOT MUST BE CONTINUOUS AND SHOULD NOT BE SPLIT BY A PATH OF MORE THAN ONE METRE IN WIDTH. PLOT BOUNDARIES ARE DEFINED ACCORDING TO THE CROPS GROWN AND THE OPERATOR.

Please list all PLOTS on all GARDENS (MUNDA) that you or anyone in your household owned or cultivated during the [REFERENCE RAINY SEASON].
